

Update and Delete with Models

Model: Project

Project
<ul style="list-style-type: none">- name- description

Update

Update

Update

```
> my_project = Project.find(1)
> my_project.name = "Ironhack updated"
> my_project.save
```

Update

```
> my_project = Project.find(1)  
> my_project.update(name: "Something else")
```

~~Delete~~

Destroy

Destroy

- > `my_project = Project.find(1)`
- > `my_project.destroy`

Destroy all

```
> projects = Project.where(name: "Ironhack")  
> projects.destroy_all
```

Exercise

Create a class method called `::clean_old` in the `Project` class that deletes all projects older than 1 week
